

INDEX TO VOLUME 60 OF THE JOURNAL OF CAVE AND KARST STUDIES

IRA D. SASOWSKY AND KEENA L. TOMKO

Department of Geology, University of Akron, Akron, OH 44325-4101, USA

This index covers all articles and abstracts published in volume 60 parts 1, 2, and 3, including the selected abstracts from the 1998 Society meeting in Sewanee, Tennessee.

The index consists of three sections. The first is a **Keyword** index, containing general and specific terms from the title and body of an article. This includes cave names, geographic names, etc. The second section is a **Biologic** names index. These terms are Latin names of organisms discussed in articles. The third section is an alphabetical **Author** index. Articles with multiple authors are indexed for each author, and each author's name was cited as given.

Citations include only the name of the author, followed by the page numbers. Within an index listing, such as "Bats", the earliest article is cited first.

Construction of the index was greatly aided by use of the KWIX indexing program, and thanks are extended to Keith D. Wheeland, the author of that software.
